Response to Amendment

1. The amendment filed on August 12, 2003 has been entered and considered.

Response to Arguments

2. Applicant's arguments, filed August 12, 2003 have been fully considered and are persuasive. The rejections of claim 1-11 have been withdrawn.

Allowable Subject Matter

3. Claims 1-11 are allowed.
4. The following is an examiner's statement of reasons for allowance:

The primary reason for allowance is that the claims state a capability for a user of a gamma camera to alter or change any parameters pertaining to the nuclear study during the operation of the gamma camera. The ability to be able to change such parameters during use is an improvement over the prior art because it enables the user to quickly change erroneous scans thus preventing possible unnecessary exposure to patients, less costlier methods for proper and accurate patient scanning, and an overall improvement over the control of the gamma camera during a nuclear study. None of the prior art of record discloses such an improvement, namely the ability to alter operating parameters of a gamma camera during the execution of the nuclear study.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
